SOUTH PLAITE IRRIGATION pulp thereby created is sold and pressed out into post cards. But these cards do

Report of Reclamation Service Offers Valuable Suggestions.

MANY SMALL PLANTS ARE NEEDED

Water Supply Plentiful to Make Possible Extensive Farming of Entire Wide Valley for Many Miles.

(From a Staff Correspondent.) WASHINGTON, Nov. 8 .- (Special.)-Intensive farming in the valley of the South Platte, between North Platte, Neb., and

Investigating the Underflow. The results of the investigation conducted by the reclamation service in the valley of the South Platte will appear in the forththe underflow waters of that valley, and the original cost of the card. whether it was practicable to make use of such waters if they were found to exist in suitable quantities for irrigation. The valley varies in width from two to eight miles and the river occupies a very sandy stretch ome 1,500 to 2,500 feet in width.

Briefly summarized, the reconnaisance of along the valley, but that it is impracticable in one of the national banks of Utah dein this section to divert any of the ground manded the right to examine the books for the high lands which border it. There reproper, of such a quality and so situated as

small irrigated tracts. Plan to Keep Engines Busy. The report finds that the quality of the gravels is especially favorable for the construction of wells of large capacity, indications being that pumping plants can be very economically constructed and proved profitable where the soil and markets are favorable. At locations where the valley reaches a considerable depth, it would seem practicable, in the opinion of the experts, to construct a central power station and transmit power to numerous small pumping plants located on small holdings of irrigable land. At Sterling it is suggested that such power could be secured from the large sugar factory which has been built at that place. At other points in the valley those factories could be established to the valley those factories and the valley those factories and the valley those factories are defined that the result may be a director in another, can readily ascertain just what business the bank in which he holds one share is doing, and it is feared that the result may be detrimental, as it practically gives a shareholder a chance to know the business of the December delicity within a range of ½c. For May was reached at 89½c. During the last few minutes of trading there was a slight few minutes of trading there was a slight few minutes of trading there was a sligh in the valley these factories could be estab-

each, than to attempt to install more plants of greater size. bills of little value for agricultural purposes. By the construction of numerous twelve-inch wells, about 100 feet in depth, along the west fork of Birdwood creek, the low stage flow of the stream could be

nearly doubled and the waters taken from

the creek near its mouth and placed upon

lands in the valley of the Platte river. Good lands in the valley of the South Platte are in large part still lying idle and the immigration of people able to make the best use of the present water resources is very much to be desired. Postals that Are Dumped.

The post card fad, which has swept the country from one end to the other, is costing the people of the United States thousands of dollars every day, for which they get no returns whatever, not even the satisfaction of knowing that their friends receive the cards which they dump sinto the mails by the hundred. This state of affairs is due to the fact that there is an entire misapprehension as to the postal laws and regulations applying to the postal rate on these mailing cards. The one which are in strict conformity with the regulations and upon which the words "postal card" are printed in conspicuous letters on one side with notice that only the address may be written on that side. If cards of this character are of the right size and right texture they go through the mails carrying a message on the reverse side at the rate of 1 cent for each card, but if they fail to comply with the regulation 2-cent postage is required, and this is where the trouble comes in. At the present time there is a concern in Washington manufacturing cards from macerated money, that is to say, bank bills or greenbacks which have been reduced in the treasury and destroyed. The verse side at the rate of 1 cent for each

out into post cards. But these cards do not comply with the regulations in that their texture is of a different character from the regular postal card. The change Wheat Rules Steady at Decline on in texture subjects them to the same rates as letters, but the public does not know this, and the manufacturers have printed on these cards a statement to the effect WEEK'S FEATURE IS AMERICAN EXPORTS that I cent will carry them anywhere. In the Washington postoffice one day this week not less than 200 of these cards were Wenther Unsettled In Argentinathrown out of the mails because of insufficient postage thereon.

Foreign Postal Laws Don't Go There is another class of cards very popular today made of leather and aluminum. Literally nundreds of thousands of these missives have been sent to the dead letter office because the senders attempted to have their souvenirs reach their destina-

washington, Nov. 8.—(Special.)—Intensive farming in the valley, of the South Platte, between North Platte, Neb., and Sterling, Colo., will receive a big impetus from the report of the reclamation service which has a recently concluded an interesting investigation in that section. Valuable practical suggestions are offered and methods suggested by which the water resources of the valley can be developed without the construction of coeff plants, and it is recommended that the engines was exact of the commended that the engines was consequently of the engines was consequently postal fad started, the "dead cards" addressed to Japan alone, which have been sent on here from San Francisco, would be sufficient to paper every room in the oming annual report of the service. This White House with these souvenirs. People vestigation was begun in the middle of who desire to remember their friends with souvenir cards, and about five people out North Platte, Neb. The work was in of every ten do so now-u-days, should charge of Prof. Charles S. Slichter and a consult the postal authorities in the city corps of assistants. Its purpose was to determine what resources, if any, existed in desire to avoid the loss of the postage and

Rights of Bank Stockholders. The United States supreme court has just handed down'a decree which is of perhaps greater interest to the national banking system than any other opinion rendered by that tribunal since it was decided some the South Platte valley indicates that there fifteen years ago in the case of the First is an ample supply of ground water for the National bank of Buffalo that directors irrigation of suitable lands in the bottoms need not direct. It seems that a stockholder water from the valley of the stream upon the purpose of ascertaining whether the officers of the bank were making proper mains, however, a considerable quantity of loans. His request was denied, and he bottom lands in the valley of the river carried the case to the court, where the action of the officers of the bank was to be especially inviting for irrigation pur- originally upheld. But upon appealing to poses. The entire valley is traversed by the supreme court that tribunal held that the main line of the Union Pacific and there the stockholder in the bank has a right the stockholder in the bank has a right to see how his money is invested. This means, if it means anything, that a man holding one share of stock in any national bank can go to that bank and find out just exactly who are the borrowers. It means, too, that a holder of a single share in one bank, who may be a director in another, seems no reason to doubt that it is capable to see how his money is invested. This of supporting a very considerable popula- means, if it means anything, that a man tion if engaged in intensive farming on | holding one share of stock in any national | The report finds that the quality of the too, that a holder of a single share in one evels is especially favorable for the con- bank, who may be a director in another.

has engaged in the manufacture of steel has engaged in the manufacture of steel in the valley these factories could be established and the powerful and expensive engines utilized during the irrigation season to see a seeman for the other large railroads propose to adopt steel as the material for the manufacture of the other large railroads propose to adopt steel as the material for the manufacture of the corn market early in the season of the valley adoptive the factory to pump underground waters upon lands planted in sugar bests. Under present conditions, during a large portion of the year the engines in the factories remain idle. In fact, they are never in operation until after the irrigation season is closed. At other points in the valley small pumping plants owned by individual farmers could be constructed for securing a supply of water for the irrigation of high-grade crops.

Many Small Plants the Need.

One of the favorable conclusions from the work in this valley is that private capital can properly develop the wafer resources existing without the necessity of constructions gainge plants requiring large capital or government aid. The situation seems to call for numerous small pumping plants rather than for a single large opiant and there can be no doubt that it will be cheaper to build numerous plants, not to cars. Speaking of the recent announcement

Townsite Sales Postponed.

cheaper to build numerous plants, not to The secretary of the interior, acting upon exceed in capacity 2,500 gallons per minute the suggestions of the governor and many prominent citizens of Idaho, has announced the postponement of sales of lots in the The discovery that water in the valley of new townsites of Heyburn and Rupert, on Birdwood creek has a considerable artesian the Minidoka project. The dates of sale, head may prove of great value to lands November 14 and 21, respectively, have near North Platte, as the lands near Bird- been extensively advertised, and indications wood creek, with the exception of a very were that a large attendance would be narrow strip of valley, consist of sand present. Owing to the lateness of the season, the possibility of bad weather and the lack of accommodations for the visitors, it was deemed wise to postpone the date of sale until early in April of next year. At that time pleasant weather can be counted upon, the water will have been turned into the new government canals, and more than one thousand of the new settlers who have already established themselves on the lands will be clearing off he sage brush and putting in their CFODE.

outrage! I can explain it all! You have no right to meddle in my business affairs! . Besides, I can prove an alibi!"

But he was too insignificant an operator. He was hurried off to the lookup.-Chicago | Co

CATTLE—There were sixty-five cars of cattle reported in this morning; of this twenty-two cars was turough shipments. It was an unusual happening to receive any cattle at this point on a Saturday and buyers and sellers did not know what to make of it. The result was that most of the stuff was carried over. As will be noted from the table above the receipts of cattle this week have been somewhat larger than for the previous three weeks, but a trifle smaller than for the first week of last month. As compared with a year ago there has been a gain of abut 4,000 head.

The week's trade on beef steers opened at prices that were just about steady with the close of last week. The run was only moderate, and during the week the more desirable kinds of cattle have been rather scarce, which, with good demand, has aided in keeping the prices steady during the week. All during the week there has been a decided shortage of cornfeds and the more choice class of cattle, while the de-

Foreign Financial,

LONDON, Nov. 4.—Money was in fair supply in the market today and the rates had an easier tendency, owing to government disturbances and the release of funds by one joint stock bank. Discounts were firmer, in view of the condition of continental exchanges, especially the Berlin position. Trading on the stock exchange was quiet and prices had an uncertain tendency. Consols were sold on the increase in the Germany bank rate. Home ralls stood out as the feature of strength, Americans opened irregular and generally under parity and rallied to parity level, at which they hesitated. Business was restricted, but prices closed fairly steady. Grand Trunk juniors were bought on the traffic increase. Foreigners were dull and irregular, Japanese imperial is of 1904 were quoted at 101%.

PARIS, Nov. 4.—Trading on the Bourse today was inactive. At the close prices were firm. Russian imperial is were quoted at 101%.

PARIS, Nov. 4.—Prices on the Bourse today were firm and the tone generally was favorable. Foreign Financial.

A JAP'S GIFT TO BOSTON Great Lantern from Old Japan to

Ornament the Public Garden of the Hub.

Before the snow files a genuine Japanese lantern, made long before the landing of the Pilgrims on Massachusetts' shores, will be erected in the public garden and further enhance the beauty of Boston's fragrant acres that are devoted to plants The lantern, constructed of heavy iron

suki of Boylston street as an acknowledgment of the good will that has been shown to him and his countrymen by the citisens Erected on the southerly side of the lake and near to the stone bridge, the lantern will add greatly to the beauty of the surrounding ground, and at night will be illuminated for the first time with elec-

tricity. For nearly 350 years an oil temp has been the mode of lighting it. The lamp itself stands 10 feet 6 inches high, and when mounted in the garden will reach the height of twelve feet.

The history of the lantern dates back to the year 1576, when the Momo ama palace in Japan was constructed by Hideyoshi's orders and its grounds were adorned with several different iron lanterns.

Hideyoshi was to the Japanese what Napoleon was to the French; he rose from the poorest and uncultured class and eventually conquored the entire island of Japan in the civil war that took place in the early part of the sixteenth century. Later he became military ruler of all Japan, and at the close of the strife showed his fondness for works of art, and it was through his ideas and influence that many of these lanterns were built. The palace from the rulps of which this tantern was taken was claimed to be of the finest architecture in Japan.-Boston
